General Information

Every year at Burnside High School we provide an "End of Year Programme" for short term students who are not taking part in the external NCEA examinations. The programme is 2 weeks long and takes place when the New Zealand students are doing NCEA examinations. This year the programme will run from Monday November 14th to Sunday 27th November

The programme changes from year to year depending on the students we have and what they are interested in. This year the programme will include a 6 day trip to Nelson to do the Abel Tasman Track by sea kayak and walking.

Students will be supervised by the staff from the International Department and teachers from Burnside High School, as well as experienced guides at different places. Transportation is provided by the school for both weeks.

We are sure that the students will have a great time exploring NZ with us and doing some of the outdoor sports that our country is so famous for.

More detailed information (times, a packing list, accommodation information etc) will be given to the students and their host families at the end of October. After the programme finishes on November 27^h, students will then officially finish their time at Burnside High School and flights home can be arranged for any time after this date.

Costs for the trip

Students **do not** have to pay for any of the activities or accommodation. This is included in their course costs for Term 4. This year they will have to take some spending money for meals (lunches and dinners) on the second week. However this should be no more than \$25 per day. On the day trips from Christchurch, homestay families will provide lunch.

Permission Slips

Each student going on the End of Year Programme will need to have a signed permission slip from their natural parents. We will email this to the agents and parents in October to be signed. Please scan and return to us by the beginning of November.

Week One – Christchurch

Monday
